PROBLEM STATEMENT

Fragemented Ecosystem

India's sports landscape is fragmented, leading to 3 key issues:

- Low visibility for aspiring athletes
- Inefficient talent discovery for scouts
- Logistical problems for event organisers

No Centralised Data

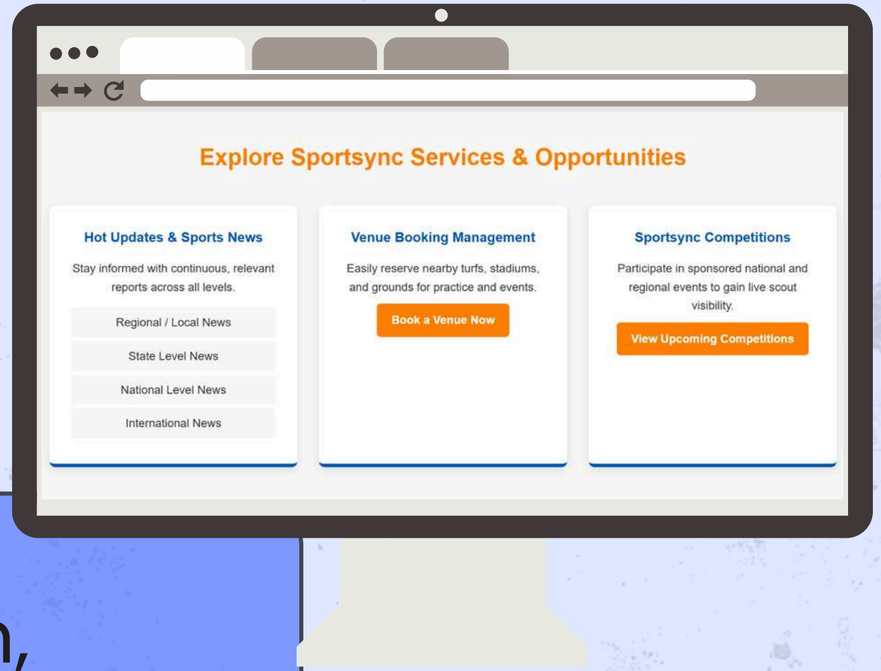
There is no centralized, data-driven platform that effectively connects athletes, scouts, and enthusiasts to facilitate talent discovery, skill-based collaboration, and efficient sports management.

Lack of athlete - scout connection

The sports industry lacks an efficient platform for connecting aspiring athletes with scouts, hindering talent recognition.

SPORTSYNC

OUR SOLUTION



Sportsync is the ultimate sports platform, connecting athletes, scouts, and enthusiasts. Our solution streamlines talent recognition, offers skill-based matchmaking, and simplifies venue bookings, empowering sports stakeholders and fostering opportunities.

COMPETITION

Fragmented Indian Landscape

Sports clubs face inefficient scouting due to subjective trials and unreliable social media data, leading to a lack of trust, standardization, and measurable talent metrics.

Targeted Global Advantage

Global competitors like NCSA and FieldLevel focus on the US collegiate model, lacking features for Indian club recruitment, venue management, and local talent verification.

Ineffective Social Connectivity

Platforms like LinkedIn and Naukri aren't built for sports, they lack data-driven athletic metrics and tools to assess raw talent.

Unique 4-in-1 Solution

Sportsync uniquely combines data- driven matchmaking, verified achievements, sponsored competitions, and venue management, serving as the core platform for Indian sports talent.
